

ISRAEL TORRES

Infrastructure & Systems Engineer | Network Infrastructure | IT Automation
Dallas-Fort Worth, TX | israeltorres.dev | linkedin.com/in/israel-torres | israel@israeltorres.dev

PROFESSIONAL SUMMARY

Infrastructure and systems engineer with hands-on ownership of multi-site networking, Microsoft 365, identity, telephony, Linux services, and internal automation for a 27-location workspace operator. Primary infrastructure resource for Dallas/Fort Worth with additional support across Houston, Atlanta, and Arizona. Combines production infrastructure administration with software engineering to reduce manual work, improve visibility, and standardize operations.

CORE TECHNOLOGIES

Networking & Infrastructure: Cisco Catalyst, Dell PowerConnect, UniFi, MikroTik, VLANs, switching, wireless, DHCP, site-to-site VPN, TDR diagnostics, Cloudflare, Linux

Identity & Systems: Microsoft 365, Entra ID, Exchange Online, Intune, Conditional Access, FusionPBX, SIP, Zoom Phone

Automation & Development: Python, PowerShell, TypeScript, JavaScript, Node.js, Express, React, Microsoft Graph, REST APIs, SSH automation, PostgreSQL, SQLite, Prisma, GitHub Actions, Nginx, PM2

PROFESSIONAL EXPERIENCE

Lucid Private Offices (formerly WorkSuites) — IT Support Specialist | February 2023 – Present

Dallas-Fort Worth, TX

- Own infrastructure, systems, and network projects for a 27-location workspace operator; serve as the primary infrastructure resource for DFW and escalation point for complex networking, Microsoft 365, and telephony issues.
- Administer multi-site networks across Cisco Catalyst, Dell PowerConnect, UniFi, and MikroTik, including VLANs, switching, wireless, DHCP, site-to-site VPN, port troubleshooting, MAC tracing, PoE control, and cable diagnostics.
- Administer Microsoft 365, Exchange Online, Entra ID, and Intune across identity lifecycle, Conditional Access, licensing, and device compliance; support Cloudflare and Linux-hosted services.
- Administer FusionPBX telephony organization-wide, including SIP trunking, dial plans, extensions, inbound routing, and troubleshooting, plus Zoom Phone.
- Built the Lucid Infrastructure Operations Platform to consolidate network operations across 40+ sites, including switch/port visibility, VLAN management, PoE control, MAC tracing, TDR diagnostics, UniFi administration, Wi-Fi analytics, and infrastructure dashboards; reduced an AP migration workflow from ~45 minutes to ~2 minutes.
- Built the Lucid Automation Server for 400+ employees using Microsoft Graph, TypeScript, PostgreSQL, and Prisma, automating Exchange workflows, VLAN drift audits, and access point monitoring.
- Built workplace occupancy and identity tooling that syncs Microsoft Entra ID with UniFi Identity based on role and office location, and developed ezeep automation supporting ~3,000 assigned seats / ~2,500 active users.
- Deploy internal services using Node.js/Express behind Nginx and Cloudflare, PM2 process management, Entra ID OIDC authentication, and GitHub Actions.

Toshiba Global Commerce Solutions — IT Field Service Technician II | June 2022 – February 2023

Dallas-Fort Worth, TX

- Diagnosed, repaired, and maintained customer technology across a DFW field territory, performing hardware and peripheral troubleshooting, component replacement, preventive maintenance, and onsite service.

NCR Corporation — Field Service Technician II | October 2021 – August 2022

Dallas-Fort Worth, TX

- Installed, configured, and repaired ATM technology across DFW for major financial institutions, troubleshooting hardware, networking, and software issues while meeting service-level agreements.
- Completed hands-on NCR technical training in Peachtree City, Georgia covering mechanical, electrical, networking, and technical diagnostics.
